

Petition to the House of Commons

We, the undersigned, **citizens of Canada**, draw the attention of the House of Commons to the following:

- That in early August 2017 roughly five tonnes of genetically modified salmon was sold in Canada;
- That this salmon likely ended up on our plate without us knowing it;
- That Canadians are concerned about the lack of information about where GMO salmon is sold;

Therefore, your petitioners call upon the Government of Canada to ban the sale and breeding of genetically modified salmon in Canada until labelling standards to warn consumers are put in place and independent safety and environmental studies have shown GMO salmon to be safe.
